Skills

Profile

Full-stack developer with 7+ years of experience building scalable, user-focused applications across telecom, IoT, fintech and gaming industries. Proficient in React, Vue, TypeScript, Node.js, Java, and Python, with hands-on experience in DevOps, cloud (AWS, Azure), and agile environments. Known for driving team culture, improving workflows with automation, and contributing to UI/UX using tools like Figma. Comfortable leading teams, mentoring developers, and stepping in as Scrum Master when needed. Passionate about continuous learning, clean architecture, and delivering scalable/robust applications.

Employment History

Full-Stack Developer/ Lead Developer/ Scrum Master at Sigma Technology AB, Stockholm

JUNE 2021 — JANUARY 2025

Client: Ericsson AB March 2024 — Jan 2025

- Working as a full-stack developer on tools supporting technical documentation workflows.
- Focused on frontend development using VanillaJS and Hugo, with backend contributions in Python and deployments on Azure.
- Independently used Figma to design and implement user interfaces.
- Supporting the team as Scrum Master when needed, helping drive agile collaboration and task ownership.

Internal Sigma Work Sept 2023 — Feb 2024

- Contributed to internal tools and initiatives while awaiting next client assignment.

Client: Telia AB Oct 2021 — Sept 2023

- Developed and maintained an internal web application critical to Telia's support systems, using VueJS and ReactJS.
- Acted as lead developer, responsible for on-boarding and mentoring new developers.
- Introduced developer productivity improvements, including custom Bash scripts to simplify daily workflows.
- Took the initiative to enhance team culture, organizing activities like weekly football sessions to strengthen collaboration.
- Participated in UX discussions and occasionally contributed to UI/UX improvements.
- Temporarily stepped in as Scrum Master, facilitating sprints and maintaining delivery momentum.

Methods and Tools used : Microservice Architecture, VueJs, Typescript, Java, Springboot, Webflux, Git, Maven, Bash, Wsl, GraphQL, VanillaJs, Python, Azure, Hugo

Software Developer at Tink AB, Stockholm

FEBRUARY 2021 — APRIL 2021

- Developed and maintained Console, a central web platform supporting all Tink products.
- Worked as part of an Agile team, contributing to sprint planning and delivery.
- Took ownership of team coordination, setting up regular syncs and summarizing planning decisions.
- Followed up on team actions to ensure alignment and smooth execution.

Methods and Tools used: React, JavaScript, Typescript, NodeJS, Git, Agile Software Developer

Languages

Hobbies

DnD, Video games, Game designing, Table Tennis.

Software Developer at Adventure Box Technology AB, Stockholm

MARCH 2020 — AUGUST 2020

- Developed and maintained Adventurebox.com, a web platform for creating and playing voxel-based games.
- Built the redesigned homepage from scratch using React, enhancing user engagement and performance.
- Contributed to a Scrum-based team, collaborating closely with designers and backend developers.
- Ensured responsive and accessible UI across devices and age groups.

Methods and Tools used: React, Javascript, MongoDB, Java, Maven, AWS, Bash, Git, Scrum

Software Developer at HMS Industrial Networks AB, Halmstad

JANUARY 2018 — FEBRUARY 2020

- Developed and maintained Netbiter, a microservices-based web platform for monitoring HMS IoT devices in industrial environments.
- Built a test environment to simulate real-time IoT conditions for validating new updates.
- Worked on DevOps tasks including AWS deployments, auto-scaling, and certification processes.
- Created Bash scripts to automate repetitive team tasks and improve daily workflows.

Methods and Tools used: Java, Maven, Docker, Bash, Git, Jira, Scrum, AWS

Industrial Thesis at Ericsson, Karlskrona

JANUARY 2016 — OCTOBER 2016

- Conducted my thesis on the research topic "Backward Compatibility Assessment Tools in Cloud Server".

Methods and Tools used: Java, Maven, Docker, Cassandra, Git, Linux
